

Amendments to the Claims:

1. (Currently Amended) A messaging user interface of a communication device of a message sender~~including a messaging user interface~~, the interface being configured for:
 - selecting a component for inclusion in a message,
 - selecting location conditions under which the message is enabled to be opened by a device of a recipient, the location conditions defining a location of the device of the recipient of the message, wherein the recipient and the message sender are different entities, and
 - storing said component as a message together with a message header holding the location conditions under which the message is enabled to be opened by the device of the recipient in a memory of the communication device.
2. (Currently Amended) A user interface device as claimed in Claim 1, in which the message header further contains information descriptive of content of the message.
3. (Canceled)
4. (Canceled)
5. (Currently Amended) A user interface device as claimed in Claim 1, wherein the message includes a plurality of components and associated presentation files.
6. (Currently Amended) A user interface device as claimed in Claim 1, in which at least one component is a multimedia file.
7. (Currently Amended) A user interface device as claimed Claim 1, wherein the device is configured for creating a presentation file associated with said component, said file being stored with said message.
8. (Currently Amended) A user interface device as claimed in Claim 7, wherein the

presentation file contains parameters relating to size and position of a component comprising a video image.

9. (Currently Amended) A user interface device as claimed in Claim 7, wherein the presentation file contains parameters relating to a volume of a component comprising an audio recording.

10. (Currently Amended) A user interface device as claimed in Claim 7, wherein the presentation file contains parameters relating to a color and a font of a component comprising a text string.

11. (Currently Amended) A user interface device as claimed in Claim 1, wherein the user interface device is configured for formatting the message as an attachment to a short text message.

12. (Currently Amended) A user interface device as claimed in Claim 1, wherein the user interface device is configured for formatting the message as an email.

13. (Currently Amended) A user interface device as claimed in Claim 1, including a wireless network interface.

14. (Currently Amended) A user interface device as claimed in Claim 1, wherein the device is a radio telephone.

15-22. (Canceled)

23. (Currently Amended) A method comprising:
Selecting a component for inclusion in a message at a communication device;
selecting, at a device of a message sender, location conditions under which the message is enabled to be opened by a device of a recipient, the location conditions defining a location of

the device of the recipient of the message, wherein the recipient and the message sender are different entities; and

storing said component as a message together with a message header holding the location conditions under which the message is enabled to be opened by the device of the recipient in a memory of the communication device.

24. (Previously Presented) The method of Claim 23, further comprising creating a presentation file associated with said component, and storing said presentation file with said message.

25. (Previously Presented) The method of Claim 24, wherein creating the presentation file comprises creating a file including parameters relating to size and position of a component comprising a video image.

26. (Previously Presented) The method of Claim 24, wherein creating the presentation file comprises creating a file including parameters relating to a volume of a component comprising an audio recording.

27. (Previously Presented) The method of Claim 24, wherein creating the presentation file comprises creating a file including parameters relating to a color and a font of a component comprising a text string.

28. (Previously Presented) The method of Claim 23, further comprising formatting the message as an attachment to a short text message.

29. (Previously Presented) The method of Claim 23, further comprising formatting the message as an email.
